About the album

Lyricaly, the album is a commentary to the phenomena that everyone encounters in life. It is the name and definition of situations in which we come to function. Difficult social relationships, internal experiences, toxic interactions with the environment. Naming them, taming them, is to help all the people involved in it find themselves in it.

"Psycho Visions" philosophy

The band follows the idea of creative freedom, breaking old patterns. Musically, we create what is natural for us, which creates a mix of four people making a band. We don't want to limit ourselves by any genre. Our goal is to create varied, unique music to give the listener something to identify with that reflects the complexity of the personality as such. Life and people are not one-dimensional, and this is what we want to convey in music. We believe that audience deserve to devote ourselves, our time and creativity to create something that will not be secondary, monotonous and boring.

In the lyrical layer, we name phenomena from the surrounding reality. We avoid abstract topics, we look in directions that are familiar to everyone. We focus on what is happening inside and outside of a person - in his psyche and in relations with others and the surrounding world. We want to show that many people go through similar things, and by naming them, we make it easier to deal with what is often difficult.
